

Family Service Link — Demo QR Sheet

Printable codes for the family pages at `/service/<token>`. Print the next pages and cut the cards along the dashed lines, or show them on a second screen. Each code resolves to the demo records built into the prototype. Scan with the phone camera, or type the code into “Can't scan? Enter the code”.

UNLOCKS WITH
Deceased last name

WRONG NAME
**5 tries, then 15 min
lock**

CAMERA NEEDS
**HTTPS or localhost
lock**

1 Toe tag verification — match

1. Scan the **Service link** QR for Juan Dela Cruz, or open `/service/q7k2m9xr4d`.
2. Enter the last name `DeLa Cruz` → Continue. Case and spaces do not matter, and the full name `Juan Dela Cruz` also works.
3. The camera starts by itself. Scan `TAG-2026-000123` (or the casket tag `CK-2026-000123`) → the three checks run → **Please review**.
4. Tick “I have reviewed...” → **CONFIRM TOE TAG** → Verification complete → **Continue to service home**.

2 Toe tag verification — mismatch

1. On Juan Dela Cruz's link, scan `TAG-2026-000124` or `TAG-2026-000456`.
2. The result is **Toe tag does not match**; the camera pauses until **Scan again**.
3. A wrong last name shows how many attempts are left; the fifth locks the link for 15 minutes.

3 Service home — authorizations and documents

1. **Confirm embalming outcome & casket design** → Review & confirm → tick → **CONFIRM**.
2. **Confirm casket before viewing** → the camera starts → scan `CK-2026-000123` → “Casket barcode matches this service” → tick → **CONFIRM CASKET**. Scanning `CK-2026-000124` here is rejected.
3. **Required documents**: Upload any photo or PDF → Under review → Accepted after a few seconds.
4. Profile shows the contracting party; the bell lists what still waits on the family.

4 Second family and starting over

1. Rosario Magbanua: open `/service/h3w8n5tb6c`, last name `Magbanua`, toe tag `TAG-2026-000124`, casket `CK-2026-000124`.
2. A link already verified opens straight on the service home.
3. **Restart demo** (service home, development only) clears that service's confirmations and uploads. Restarting the dev server clears them all.

The service link QRs encode `http://localhost:3000/service/<token>`. A phone needs the page over HTTPS (or the laptop's own browser on localhost) for the camera; otherwise use “Can't scan? Enter the code”.

SERVICE LINK

/service/q7k2m9xr4d

Unlocks with last name

Dela Cruz

TOE TAG

TAG-2026-000123

Juan Dela Cruz

Scan on the toe tag verification step.

CASKET TAG

CK-2026-000123

Chapel 3 · St. Joseph

Scan for "Confirm casket before viewing", or instead of the toe tag.

MISMATCH TOE TAG

TAG-2026-000456

Leonora Batungbakal · no service link

Rejected on either link: "Toe tag does not match".

SERVICE LINK

/service/h3w8n5tb6c

Unlocks with last name

Magbanua

TOE TAG

TAG-2026-000124

Rosario Magbanua

Also the mismatch tag on Juan Dela Cruz's link.

CASKET TAG

CK-2026-000124

Chapel 5 · St. Therese

Also the mismatch casket on Juan Dela Cruz's link.

HOW TO USE

1. Scan the service link QR with the phone camera, or type the path after the app's address.
2. Enter the last name shown on the link card.
3. Hold the toe tag QR in the viewfinder — the camera starts by itself.
4. Review, tick, and confirm. The service home opens next.
